

MEDICARE FINANCIAL POLICY

Medicare covers **Chiropractic manipulation only**. These services are covered after you have met your deductible every year. Manipulations are usually limited to 12 to 24 visits per 12-month period. The number is dependent on Medicare's decision of Medical Necessity.

Examination and x-rays are **NOT** covered by Medicare and are not applied to your deductible; therefore we ask that you pay for these services on your first visit. X-rays must be available for Medicare Review.

If you have additional Health Insurance they usually **do not cover any services not approved by Medicare**. They may or may not pay for chiropractic manipulations. We do not file secondary insurance but will show you how to do so yourself if Medicare does not roll it over.

We will do all that we can to help get your claims paid. Please understand that we do not make the rules, but we do abide by them.

- **By signing this document, I am taking full responsibility for payment of the services I receive at P.S. Chiropractic, Inc.**
- Furthermore, I agree that if I do not abide by the financial policies stated above, my account will be turned over to your collections agency with a 45% collection fee to be collected at my expense.

Everything that I have stated in my Chiropractic Registration and History Form is correct. I understand that you will retain this Chiropractic Registration and History Form in my file.
